# EXPLOITING MOLECULAR MACHINES ON SURFACES

SANDRA M. MENDOZA

University of Groningen  
**Zernike Institute**  
**for Advanced Materials**

Zernike Institute PhD thesis series 2007-13  
ISSN 1570-1530  
ISBN: 978-90-367-3129-4 (printed version)  
ISBN: 978-90-367-3206-2 (electronic version)

The work described in this thesis was performed in the research group ‘Surfaces and Thin Films’ of the Zernike Institute for Advanced Materials of the University of Groningen, The Netherlands.

Cover design: Marcel Zinger (Facilitair Bedrijf RuG).

Printed by: Facilitair Bedrijf RuG, Groningen.

# EXPLOITING MOLECULAR MACHINES ON SURFACES

## **Proefschrift**

ter verkrijging van het doctoraat in de  
Wiskunde en Natuurwetenschappen  
aan de Rijksuniversiteit Groningen  
op gezag van de  
Rector Magnificus, dr. F. Zwarts,  
in het openbaar te verdedigen op  
maandag 12 november 2007  
om 14.45 uur

door

Sandra Marina Mendoza

geboren op 29 maart 1978  
te Romang, Argentinië

# CONTENTS

|  |           |
|--|-----------|
| <b>Chapter 1: Introduction</b>                                 | <b>1</b>  |
| 1.1 Nanoscience and Nanotechnology                             | 2         |
| 1.2 Molecular device and molecular machine                     | 3         |
| 1.3 Example 1: Dithienylethene switches                        | 4         |
| 1.4 Example 2: Rotaxanes                                       | 5         |
| 1.5 Aim of the present research                                | 6         |
| 1.6 Outline of the thesis                                      | 6         |
| References   | 7         |
| <b>Chapter 2: Experimental details</b>                         | <b>11</b> |
| 2.1 X-ray photoelectron spectroscopy (XPS)                     | 12        |
| 2.2 Contact angle  | 12        |
| 2.3 Scanning tunnelling microscopy (STM)                       | 13        |
| 2.4 Sample preparation   | 13        |
| 2.4.1 Gold substrates  | 13        |
| 2.4.1.1 <i>Gold on glass</i>                                   | 13        |
| 2.4.1.2 <i>Gold on mica</i>                                    | 15        |
| 2.4.1.3 <i>Gold on silicon oxide</i>                           | 16        |
| 2.4.2 Silver substrates  | 18        |
| 2.4.3 Alkanethiol self-assembled monolayers (SAMs)             | 18        |
| 2.4.4 Rotaxane films   | 19        |
| 2.4.4.1 <i>Rotaxanes on metal substrates</i>                   | 19        |
| 2.4.4.2 <i>Rotaxanes anchored on self-assembled monolayers</i> | 20        |
| 2.4.5 Films of 1,2-dithienylethene switch                      | 20        |
| References   | 21        |
| <b>Chapter 3: A dithienylethene switch in thin films</b>       | <b>23</b> |
| 3.1 Introduction   | 24        |
| 3.2 Identification of the open and the closed forms            | 24        |

---

|  |           |
|--|-----------|
| 3.2.1 UV/vis spectroscopy results  | 24        |
| 3.2.2 X-ray photoemission spectroscopy results   | 26        |
| 3.2.2.1 <i>S 2p</i> core level dependence on the isomer chemical structure                 | 26        |
| 3.2.2.2 <i>N 1s</i> core level dependence on the isomer chemical structure                 | 28        |
| 3.2.2.3 <i>C 1s</i> core level dependence on the isomer chemical structure                 | 29        |
| 3.3 Switching between the open and the closed forms with UV/vis light irradiation          | 29        |
| 3.3.1 From open to closed form   | 29        |
| 3.3.2 From closed to open form   | 30        |
| 3.4 Dithienylethene switch self-assembled on Au(111)                                       | 32        |
| 3.5 Stability of dithienylethene under X-ray irradiation                                   | 35        |
| 3.6 Conclusions  | 36        |
| References   | 36        |
| <b>Chapter 4: Study of the adsorption of fumaramide [2]rotaxane on Au(111) and Ag(111)</b> | <b>39</b> |
| 4.1 Introduction   | 40        |
| 4.2 Results and discussion   | 40        |
| 4.2.1 X-ray photoelectron spectroscopy   | 40        |
| 4.2.2 Molecular dynamic simulations  | 45        |
| 4.2.3 High-resolution electron energy loss spectroscopy                                    | 47        |
| 4.2.4 Scanning tunnelling microscopy   | 49        |
| 4.3 Conclusions  | 50        |
| References   | 51        |
| <b>Chapter 5: Acid-terminated alkanethiol self-assembled monolayers on Au(111)</b>         | <b>53</b> |
| 5.1 Introduction   | 54        |
| 5.2 The crystalline structure of SAMs as seen by STM                                       | 56        |
| 5.3 Qualitative analysis and thickness estimation  | 60        |
| 5.4 Wettability properties   | 63        |
| 5.5 Conclusions  | 64        |
| References   | 65        |
| <b>Chapter 6: Macroscopic transport by synthetic molecular machines</b>                    | <b>69</b> |
| 6.1 Introduction   | 70        |

|   |            |
|---|------------|
| <i>Contents</i>   | iii        |
| 6.2 Characterization of the <i>E</i> -1.11-MUA.Au(111) surface                    | 71         |
| 6.2.1 Are the rotaxanes on the 11-MUA surface?                                    | 71         |
| 6.2.2 Estimation of the rotaxane coverage   | 74         |
| 6.2.3 <i>E</i> -1.11-MUA.Au investigated by STM                                   | 75         |
| 6.2.4 Stability under UV irradiation  | 77         |
| 6.2.5 The photo-responsive <i>E</i> -1.11-MUA.Au surface                          | 79         |
| 6.3 Macroscopic transport   | 79         |
| 6.4 Reactions-without-vessels performed on the <i>E</i> -1.11-MUA.Au(111) surface | 86         |
| 6.5 Conclusions   | 88         |
